

Canada Life Diversified Real Assets Fund

Sub-advisor

Cohen & Steers

Risk rating

Low-Medium

Key highlights

- **Inflation sensitivity:** real assets can perform well during periods of inflation which are usually damaging to stock and bond returns
- **Attractive total returns potential:** real assets have historically delivered attractive returns over a full market cycle, which may improve risk adjusted portfolio returns without sacrificing long-term growth
- **Enhancing diversification:** working together with traditional stocks and bonds, real assets have unique economic sensitivities which can help reduce volatility and enhance diversification benefits in a portfolio throughout the market cycle

Building more resilient portfolios with real assets

Why invest?

Global conflicts, inflation and changing monetary policies have created challenges for traditional stocks and bonds. This is where real assets come in. They're tangible structures and raw materials like real estate, commodities, infrastructure and natural resources. They've historically helped to enhance diversification benefits in portfolios against specific risks, particularly inflation and market volatility.

What does this fund do?

The fund seeks to provide long-term capital growth and maximize real returns during periods of inflation. It invests in a blend of four real asset classes. The fund also invests in certain short-term fixed-income securities with the aim of managing portfolio volatility.

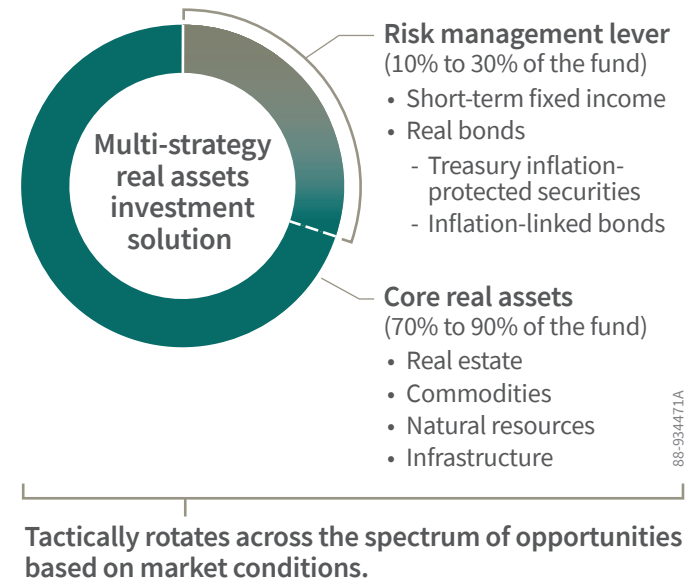

Who is this fund for?

Investors who:

- ✓ Are looking for a multi-asset fund to hold as part of their portfolio
- ✓ Are seeking less exposure to inflation than is typical in other funds
- ✓ Can handle the volatility of bond, stock, real estate, commodity and metals markets

Investment approach

This fund is strategically constructed and tactically managed to navigate market ups and downs. It's a multi-strategy fund that blends four real asset classes together with short-term fixed-income securities and real bonds. These strategies work together to help the fund navigate market changes.

Benefits of the multi-strategy blend

Real assets seek to:

- Provide diversification to help manage volatility
- Deliver attractive risk-adjusted return potential
- Protect during inflationary periods

Short duration fixed income and real bonds seek to:

- Maintain value during periods of uncertainty
- Act as a defensive mechanism to manage volatility
- Protect during inflationary periods

Sector Equity
